12:57:21 from Kellye Rowland: So if you're is still in the previous sign on your "0" birthdate you put that one down? (So mine was still in cancer before Leo the next day)

12:58:30 from April Sugarman: Is this the same thing as looking at your progressed moon for the current year?

13:01:30 from Kellye Rowland: Can I real quick see the example page again of yours at some point?

13:05:54 from constance Z. (she.her): i don't see my leo moon on the date i was born with this chart. shouldn't that line up?

13:07:04 from April Sugarman: Capricorn progressed moon. The last time this happened I was 22-23 and was working with my dad at the time. I started this capricorn progressed moon last year and did a bunch of work for my dad at that time and it was also the year he sold his business (the one I worked with him at 28/29 years ago). Is this in line with what you're talking about?

13:08:52 from constance Z. (she.her): right, Kellye!

13:08:56 from Kellye Rowland: Yayyyy

13:09:38 from Kellye Rowland: It's the time the ephemeris is operating under I think, the Switzerland time

13:09:41 from Kellye Rowland: I think

13:10:30 from Kellye Rowland: This is really cool
